

AP COMPUTER SCIENCE
DR. PAUL L. BAILEY

Lesson 03/24
Monday, March 23, 2020

Your assignment for today is to continue to work on your Cryptography project.

You will not turn in Project 34a separately from Project 34b. Turn them in together, in the same Netbeans Project. Everyone please acknowledge that you have read this by accessing this Google Forms checkin:

0324 AP Computer Science Checkin

You will be graded on whether you fill out these forms, or not. So please do it.

Please also read yesterday's post. It seems that the College Board has eliminated the two most difficult types of questions on the exam, those being the questions involving recursion and inheritance. We will verify this in the weeks ahead.
