AP Calculus AB   Lesson 03/26
Dr. Paul L. Bailey   Wednesday, March 25, 2020

I would like to make sure that you can all complete a written assignment and send it to me via Microsoft teams.

Your assignment for today is:

- Review the material we have covered so far in Thomas Sections 7.2 through 7.5.

- Print your homework, `HCalABx0327.pdf`. This is a very nice worksheet that was cordially supplied by a wonderful person who you all may remember. Complete the problems. Write neatly. You may want to work on scratch paper first.

- Scan your work or take a clear photo of it with your phone.

- Send it back to me back uploading a file in Microsoft Teams under the appropriate assignment in the assignment tab.

After you have uploaded your homework, indicate that you have done so with this checkin:

<div align="center">0327 AP Calculus AB Checkin</div>

I plan to have "Office Hours" for this class on Monday, March 30, at 11 AM. Let me know if you can make it on the Google Form. This will be a Microsoft Teams meeting, and will be an opportunity for us to touch base and to ask and answer questions. Try to make it if you can. With any luck I will have a functioning document reader to write on.

This is an article which relates to what you have been learning:
