

Good day to all of my AP Computer Science students.  
Your assignment for today is:

- Submit your current version of **Graph.java** to the appropriate assignment in Microsoft Teams, if you have not already done so.
- Work on homework assignment H0406, which is in AP Classroom. Answer on-line. Due tomorrow if possible, cuts off on Wednesday. First, you will need to download, install, and verify the “Lockdown Browser”:

<https://apclassroom.collegeboard.org/lockdown>

- After you have completed this, fill out the Daily Checkin:

#### 0406 AP Computer Science Checkin

*Please let me know if you are unable to access the exam in AP Classroom.*

For the remainder of our course, we will continue to practice coding, in preparation for the AP examination. This will be done through a combination of AP Classroom and assessments that I will create. Your final project will be the Graph Theory project; some of your remaining assignments will be to add features to this.

Grading moving forward will occur as follows:

- There will be no more examinations in our course other than the AP examination. However, you may raise your exam score by filling in all of the checkins. Each checkin is worth 0.3 extra credit points toward your exam total.
- We will have one on-line quiz per week which will count towards your quiz score.
- We will have daily classwork/homework which will be graded on effort, some on-line through AP Classroom and some assessments I will make.
- BASIS will announce a new AP Final Grade Adjustment at some point in the future.

I will write solutions for the problems that give people trouble. Any specific questions will help me to help you; I will focus my responses on your questions.

Please feel free to send me a message any time on Microsoft Teams.
