

AP COMPUTER SCIENCE
DR. PAUL L. BAILEY

Lesson 0415
Wednesday, April 15, 2020

Tomorrow, Thursday April 16, 2020, we will have a quiz. It will be a free response question on AP Classroom, which I will attempt to grade according to the official AP rubric.

Next week we will have a Mock AP examination that will help BASIS determine who is prepared to take the actual AP examination. Your participation in this on-line class should help you prepare for the Mock AP examination as well as the actual AP examination.

Your assignment for today is to continue to work on `isConnected`, `numberOfComponents`, (due today) and `isTree` (due Friday). There is no checkin today.

Please feel free to send me a message any time on Microsoft Teams.
