

AP CALCULUS AB
DR. PAUL L. BAILEY

Lesson 0416
Thursday, April 16, 2020

Your assignment for today is to take quiz Q0416 on AP Classroom. We use this platform for the quiz in the hope of practicing for the actual AP examination. This is a free response question. Please remember to write with words and justify your answers. You cannot get full credit on the AP unless your answers are justified. In fact, “bald” answers are often given only one or even zero points.

The quiz is timed. You have 60 minutes to complete it. Remember that the actual AP will have two free responses in 45 minutes, so work efficiently.

There is no checkin today.
