AP Calculus AB   Lesson 0423
Dr. Paul L. Bailey   Thursday, April 23, 2020

The AP Calculus AB online exam is scheduled for Tuesday, May 12, at 11:00 AM Pacific Time. Students will have 25 minutes to read and respond to Question 1, and then 5 minutes to upload their response. After uploading the response to Question 1, students will have 15 minutes to respond to Question 2, with 5 additional minutes to upload their response to Question 2. Once their response to Question 1 has been submitted, they cannot go back to it.

We will have a quiz tomorrow. This is primarily to get some more timed practice with AP Classroom.
We will have a "mock AP exam" next week. The exam will be at Wednesday, April 29, at 1:00 PM. The format will be AP Classroom, two FRQs in 60 minutes.
You will only have 45 minutes on the actual AP, but that will be after an additional two weeks of practice.

Today's assignment:

- There are two homework assignments. Please do at least one of them. You do not have to submit your solutions.

  - H0423d includes two shorter AP problems regarding differential equations. I will go over these problems in a teleconference at 10 AM.

  - H0423e includes an AP problem regarding the graph of a derivative. I will go over this problem in a teleconference at 1 PM.

- Let me know how you did here:
