

Information from the College Board

The AP Calculus AB online exam is scheduled for Tuesday, May 12, at 11:00 AM Pacific Time. Students will have 25 minutes to read and respond to Question 1, and then 5 minutes to upload their response. After uploading the response to Question 1, students will have 15 minutes to respond to Question 2, with 5 additional minutes to upload their response to Question 2. Once their response to Question 1 has been submitted, they cannot go back to it.

I received this additional information from College Board.

Encourage your students to review their contact information. We're communicating with the AP community primarily by email. To ensure your students are receiving critical information, make sure they log in to My AP to remind themselves of the email address and cell phone number they've asked the College Board to use. If they want, students can change how we contact them. Two days before each exam, students will receive an email with a personalized e-ticket that will include their eight-character AP ID code. If a student still doesn't receive the email, they'll be able to access their e-ticket directly through My AP.

They also asked me to share their Pep Talk.

Information about our course

We will have a "mock AP exam" on Wednesday, April 29, at 1:00 PM. The format will be AP Classroom, two FRQs in 60 minutes. You will only have 45 minutes on the actual AP, but that will be after an additional two weeks of practice.

Today's assignment

- Access the following signin sheet, and make sure you are in the *Week of 0427* sheet, and put your name in an appropriate slot. We will meet in groups of six. If you wish to attend a meeting that you have not signed up for, that is great, but you must sign up for one of the slots on the shared spreadsheet.

AP Calculus AB Teleconference Signin Sheet

Access the teleconference as a Meeting in Microsoft Teams in the Chatroom channel at the appropriate time.

- Read the solution to Q0424 in document [QCalABx0424-Solutions.pdf](#).
- Access homework assignment H0427 in AP Classroom.
This problem asks you to show something. Write your solutions neatly on a piece of paper. Use words and sentences. Then try to type it into AP Classroom.
- Let me know how you did here:

Your Suggestions

These are the former AP problems you and your classmates suggested we go over. I will try to write some intelligible solutions to the noncalculator problems.
